CLEAN-PERFECT PROFESSIONAL COVERALLS

USE OF COVERALL

CLEAN-PERFECT™ Professional Coveralls are designed to be worn in hazardous environments where there is a risk of contamination from liquids, solids, dusts, and gases. The coveralls are made of a high quality, tear-resistant material and are designed to provide maximum protection against contamination. They are suitable for use in a wide range of applications, including industrial, agricultural, and laboratory work.

APPLICATIONS

CLEAN-PERFECT™ Professional Coveralls are suitable for use in a wide range of applications, including industrial, agricultural, and laboratory work. They are designed to provide maximum protection against contamination from liquids, solids, dusts, and gases.

SAFETY INSTRUCTIONS

Always wear your coveralls in the correct manner. Do not wear them if they are damaged or if they do not fit properly. Always wear your coveralls in the correct manner. Do not wear them if they are damaged or if they do not fit properly. Always wear your coveralls in the correct manner. Do not wear them if they are damaged or if they do not fit properly.

SAFETY INSTRUCTIONS (CONTINUED)

Always wear your coveralls in the correct manner. Do not wear them if they are damaged or if they do not fit properly. Always wear your coveralls in the correct manner. Do not wear them if they are damaged or if they do not fit properly. Always wear your coveralls in the correct manner. Do not wear them if they are damaged or if they do not fit properly.

CAUTION

Do not wear coveralls away from the workplace in order to prevent the risk of contamination.

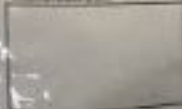

WARNING

Do not wear coveralls in the presence of open flames or other sources of heat. Do not wear coveralls in the presence of open flames or other sources of heat.
