MOISTURIZING CREAM

Defying Complex

Active Retinol 2.5%
& E | Hyaluronic Acid

1.7 fl. oz 50ml

Retinol is the gold standard for anti-aging and skin renewal. It works by accelerating cell turnover, which helps to reduce the appearance of fine lines and wrinkles. Retinol also helps to improve skin texture and tone, leaving your skin looking smoother and more radiant. For best results, use Retinol Moisturizing Cream consistently, both day and night.

Retinol is a powerful ingredient that can help to improve the overall health and appearance of your skin. It is a natural derivative of Vitamin A and is known for its ability to stimulate collagen production and reduce the appearance of aging signs. Retinol Moisturizing Cream is formulated with a gentle, non-irritating formula that is suitable for all skin types.
